

## Database Error!

The connection string to the folder the i-Gallery database is in is configured properly but the directory/folder the database is in does not have **"write"** poperties. i-Gallery tested the folder by trying to write a small text file to the directory and the server rejected the request. The i-Gallery database needs to be in a folder that has write properties. Please adjust the settings of this folder then clicik on the link below to re-test the directory/folder. A successful test will enable you to move on to the main set-up screen!
